Grupa Azoty issues a warning against a fraud attempt

Grupa Azoty would like to warn its trading partners of fraudulent attempts to obtain payments. Scammers impersonating Grupa Azoty employees send a message notifying a change of bank account details and fake invoices to the company's trading partners.

The scammers **gain the trust of their victims by posing as the Grupa Azoty employees** with whom electronic communications have previously been exchanged. To that end, **they send email messages from domain addresses similar to those registered by Grupa Azoty**. For instance, the sender's address might contain *@grupaazotys.com* instead of *@grupaazoty.com*.

Therefore, **we request our trading partners to double check** (*read carefully*) the email address of the sender of a message coming from a Grupa Azoty employee **and pay attention to the quality and correctness of the documents** attached to email messages (*for example, by checking whether the bank account details are correct*). If you have any doubts, please contact the relevant business unit in order to confirm the authenticity of an email message.
